

SMART START FOR BETTER YIELDS

Closed System Handling Safety

- SmartBox® closed-application system:
- Eliminates opening and pouring bags
 - Reduces risk of contact and inhalation
 - Eliminate handling and disposing of bags
- More than closed-application handling:
- Handling, monitoring and precision
 - Application system
 - Records weather data at application

Application Accuracy

The **SmartBox meter** contains both metering and flow-sensing functions to ensure accurate application. Unlike a conventional system, SmartBox **varies metering of granules as ground speed changes** to maintain desired rate. A simple and quick calibration ensures you get accurate and precise application rates for **maximum protection from rootworms and seed-attacking pests**.

Primed for Precision Farming

In-cab computerized controller for smart and easy precision application, monitoring and record keeping.

- Large format color display
- User-friendly, intuitive menu and improved reporting software
- 12V or 24V compatibility
- Row control sets rates by individual row or row groups

Versatility That Fits Any Planter

From Case IH® to John Deere® to Great Plains® to Kinze® to White™, the SmartBox system has brackets available that will allow mounting on virtually any planter. Contact AMVAC® at 1-888-SMARTBOX, Option #2, or email SmartBox@AMVAC.com to discuss the right set-up for your planter. **Accuracy, Safety and Versatility** — make the smart move to the SmartBox Closed Handling and Application System.

SmartBox closed-application system.

The SmartBox Meter contains both metering and flow-sensing functions to ensure accurate application.

In-cab computerized controller for smart and easy precision application, monitoring and record keeping.

Red, white, blue, green and all colors in between: the SmartBox System fits your planter
