

UNDERSTANDING THE DEADLINE® DIFFERENCES

The DEADLINE molluscicide products from AMVAC provide excellent slug and snail control across multiple crop types. DEADLINE® M-Ps™, DEADLINE® GT™ and DEADLINE® Bullets™ all utilize the same active ingredient, but provide different features and benefits depending on your operation's needs. Use the chart below to discover the differences.

	DEADLINE® M-Ps [*] 5481-507*	DEADLINE® GT [*] 6836-350-5481*	DEADLINE® Bullets [*] 5481-507*
Active Ingredient	Metaldehyde (2,4,6,8-Tetramethyl-1,3,5,7-tetraoxycyclo-octane)		
Formulation	Pellets	Extruded Granule	Pellets
Color	Blue	Blue	Tan
Concentration	4%	3%	4%
Features/ Benefits	<ul style="list-style-type: none"> • Better pellet count per pound to provide more baiting points. • Attracts slugs and snails so they feed longer. 	<ul style="list-style-type: none"> • Re-hardens multiple times for optimal effectiveness and longevity. • Long lasting: Resistant to rain and watering. 	<ul style="list-style-type: none"> • Better pellet count per pound to provide more baiting points. • Natural coloring for non-dye applications.
Key Pest	Slugs and Snails		
Crops	Field, citrus, and vegetable crops. *See label for specific crop application.	Field, fruit, citrus, and vegetable crops. *See label for specific crop application.	Field, berries, and vegetable crops. *See label for specific crop application.
Application Timing	Number of applications allowed per season are indicated by specific crop on the label.	Number of applications allowed per season are indicated by specific crop on the label.	Number of applications allowed per season are indicated by specific crop on the label.
Rates <small>*rate varies by crop, see label for details</small>	10 – 25 lbs/acre	13.3 – 33.3 lbs/acre	10 – 25 lbs/acre
Application Instruction	Apply as a soil surface treatment. Use a band treatment between the plant rows. Apply around the approved crops listed on the label. For best results, apply following rainfall, irrigation or onto damp soils in the evening.	Apply by hand or with commercial application equipment designed for banded application of granular products, unless broadcast application is specifically permitted for the crop being treated. For optimum results, apply following rainfall, irrigation or onto damp soils in the evening.	Apply as a soil surface treatment. Use a band treatment between the plant rows.
